

## **BREWING LIQUIDS**

KEY

Stock item Order only Liquid additions for beer, boosting aroma & flavour without the losses experienced with whole cone or pellet hops.

Abstrax Hops® is a California-based, hyper-innovative business we have partnered with for UK and EU brewers. These true-to-type hop, cannabis and fruit flavours are incredibly impressive and open up new avenues for beer tastes, as well as efficiency savings by cutting beer losses.

| ABSTRAX QUANTUM BRITE HOP EXTRACTS FOR<br>FLAVOUR AND AROMA<br>30ml / hl is equivalent to approx. 1 kg of T90 cold-side addition, recommended<br>for replacing 10-50% of dry hop | 118 ml | 948 ml | 3,780 ml |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|----------|
| VG1 (US proprietary hop)                                                                                                                                                         |        |        |          |
| AZA (US proprietary hop)                                                                                                                                                         |        |        |          |
| CAS (Cascade)                                                                                                                                                                    |        |        |          |
| CEN (Centennial)                                                                                                                                                                 |        |        |          |
